Mr. James R. Janssen
Remedial Response Section
Division of Land Pollution Control
Illinois Environmental Protection Agency
2200 Churchill Road - P.O.Box 19275
Springfield, Illinois 62794-9276

Dear Mr. Janssen:

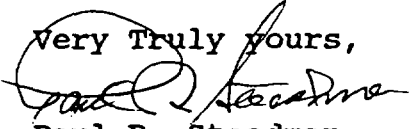

RE: Request for Identification of ARARs for the Interstate
Pollution Control / Rockford Roto-Rooter Site Removal Action

The United States Environmental Protection Agency (U.S. EPA) is proceeding to order the owners and operators (PRSS) of the referenced facility in Rockford, Illinois to perform a removal action at that site within the next ten days. This removal action will include securing the site with a fence surrounding the periphery of facility, capping of the eroded area of the lagoon system in the northeast central area of the site, removal of the above ground storage tank and the underground storage tanks as well as their contents for subsequent disposal of the hazardous and nonhazardous fractions within these containers, and verification of removal of any contaminated earth beneath or adjacent to the tanks.

This letter is being sent to request that the Illinois Environmental Protection Agency identify all applicable or relevant and appropriate requirements (ARARs) for the IPC site removal action. Any State ARARs identified in a timely manner will be complied with to the extent practicable.

If you have any questions regarding this letter, please contact me at telephone number 312/353-7615 or via FAX at 312/353-9176.

Very Truly yours,

Paul R. Steadman
On-Scene Coordinator
Emergency and Enforcement Response Branch
